

THE LEFT are a close-knit family of light-hearted brothers and cousins. This exceptionally talented band of entertainers grew up in the same village of Langley, British Columbia and attended the same high school and college. All were taught music by the same teacher, Mr. Davis (father of brothers Eric and Carl). This tight family bond has developed an “all for one, one for all” attitude, which transfers to the stage in perfected four-part harmony as they share in the musical responsibilities of THE LEFT.

The romantic and thought-provoking music of THE LEFT seems to flow from the band effortlessly. Driven with an emotional undertone of “melancholy meets hope” and delivered through a crafted wall of inspired sound, THE LEFT have a knack for creating integral songs, flushed full of heartfelt honesty and substance. Inspired by contemporary favorites such as Death Cab For Cutie, with respects paid to classic giants of our time such as the Beatles and Coldplay, THE LEFT is a new movement, gaining quick momentum and allegiance with loyal followers - and they're only just beginning to shine!

THE LEFT was produced by multi-platinum award-winning **GGGarth Richardson (Rage Against The Machine, Red Hot Chili Peppers)** and **Ben Kaplan (Shakira, Hedley)**. Each song has been a work of love and the band has been developing their sound with this team for the past five years. Radio will be pleased as the CD was mixed by one of the most prolific mixers of the last decade, **Randy Staub (Bryan Adams, U2)** and professionally mastered in Hollywood by world-renowned **Alan “Blues Lee” Yoshida (Paul McCartney, Miles Davis)**. The album is an eleven-song, sonically impeccable powerhouse that is sure to translate on AAA and AC radio formats.
